## EDUCATION

**Graphic Era Hill University** 2023-Present
Bachelor of Technology in Computer Science Engineering
**Social Baluni Public School** 2023
Intermediate
**Social Baluni Public School** 2021
Matriculation

## TECHNICAL SKILLS

| | |
|---|---|
| **Languages** | C, C++, JavaScript, Python, SQL. |
| **Frameworks/Technologies:** | React.js,Redis,Tailwind CSS,Node.js,REST APIs,Express.js. |
| **Developer Tools:** | Git,Visual Studio Code, GitHub. |
| **Database:** | MySQL,MongoDB,PostgreSQL. |
| **Coursework:** | Data Structures and Algorithms, OOP, Operating Systems, Computer Networks. |

## PROJECTS

**StreamHive — Full Stack Video Streaming Platform** — React.js, Node.js, Express.js, MongoDB, Redis, Tailwind CSS, Cloudinary **July 2026 – Present**

- Developed a YouTube-inspired full-stack video streaming platform using React.js, Node.js, Express.js, and MongoDB with secure JWT-based authentication and RESTful APIs.
- Implemented core features including video upload, watch history, playlists, likes, comments, subscriptions, and channel management with role-based authorization.
- Optimized complex MongoDB aggregation pipelines using `$lookup`, `$addFields`, and `$project` to efficiently retrieve channel profiles and user watch history.
- Integrated Cloudinary for secure media storage and delivery, enabling efficient image and video upload management.
- Implemented Redis caching for frequently accessed data to reduce database load and improve API response times, while following a modular MVC architecture with centralized error handling.

**LocalLens — Hyperlocal News & Community Bulletin Platform** — React.js, Node.js, Express.js, PostgreSQL, PostGIS, JWT, Tailwind CSS **Aug 2026 – Present**

- Developing a full-stack hyperlocal bulletin application enabling users to discover and post real-time local news, emergency alerts, and events within a dynamic 5–10 km radius.
- Implementing location-based feed filtering using PostgreSQL and PostGIS (`ST_DWithin`) with GIST spatial indexing, radius toggling, category filtering, and Cloudinary media uploads.
- Designing modular RESTful APIs using Express.js with JWT authentication, Role-Based Access Control (RBAC), and multi-tiered content moderation & reporting systems.

## ACHIEVEMENTS

- Solved 200+ Data Structures and Algorithms problems across multiple coding platforms.
- Completed the Oracle Generative AI Certification, gaining hands-on experience with modern AI models, prompt engineering, and enterprise-level AI applications.
